Digital Marketing Checklist for a Small Shop

Promoting your shop on a small budget — checklist by checklist — Free preview

Digital marketing does not only mean running ads. It means getting your shop's message to the right people, at the right time, in the right way.

A small shop has a small budget. So before spending money, you need to decide — whom to tell, where to tell them, and what to say. A checklist makes that work easier.

What is it?

This guide contains no big spending. It has small daily and weekly tasks — posts, messages, photos, feedback, and records.

Working from a checklist means nothing is forgotten, and at the end of the month you can see which work got a response and which did not.

How to start — a glimpse

1. First write down who your customer is — age, area, and what they want to buy. Aim at specific people, not everyone.
2. Choose one or two channels — where your customers actually are. Do not start everywhere at once.
