Claude Tutorial

Anthropic's AI assistant — long writing, documents, code — Free preview

Claude is the AI assistant built by Anthropic. You can use it at claude.ai or in the mobile and desktop apps. A free account needs only an email — no credit card.

Claude is especially good at long writing, document analysis and coding. The free plan includes the Sonnet and Haiku models, web search, Artifacts (live previews of code, documents and designs) and up to 5 Projects.

What is it?

Claude's special feature is Projects — a separate workspace per piece of work, where you keep rules and files. And in Artifacts, what you build shows live beside the chat.

In this guide you will learn: how to start Claude, how to use it for long writing and documents, how to organize Projects, and the free plan's limits.

How to start — a glimpse

1. Open claude.ai or download the Claude app.
2. Sign up with email or a Google account — the free plan starts by itself.

📚 Get the full guide in the app — 10 Stars / 10 ZERO

Open @BazarGooBot on Telegram → "🛍️ দোকান খুলুন" → 📚 My PDFs — you will find this guide there. Buying gives you both the Bangla and English versions.
