Perplexity Tutorial

The answer engine — correct information with sources — Free preview

Perplexity is an AI-powered 'answer engine'. An ordinary search engine gives a list of links; Perplexity gives a direct answer — and shows a source link beside each fact, so you can verify it yourself.

Perplexity searches the live web and writes an answer. The free plan gives unlimited quick searches, a few Pro Searches a day, and limited file uploads. On the Pro plan you can pick the model (GPT, Claude, Gemini) and limits are much higher.

What is it?

Perplexity is very good for research, study, fact-checking and learning about markets.

In this guide you will learn: how to start Perplexity, how to ask good questions, what Pro Search is, and how to check sources.

How to start — a glimpse

1. Open perplexity.ai or download the Perplexity app.
2. You can ask without an account; with an account, history is saved.

📚 Get the full guide in the app — 10 Stars / 10 ZERO

Open @BazarGooBot on Telegram → "🛍️ দোকান খুলুন" → 📚 My PDFs — you will find this guide there. Buying gives you both the Bangla and English versions.
